Description & Analysis

Europe

Traffic in May was at 38.6% of May 2019 levels, there was a large traffic increase over the two first weeks of the month. May traffic is aligned with the traffic scenario of 39% published by EUROCONTROL in May 2021. On average, the network saw 12,299 flights/day. The peak day was 28 May (16,459 flights) with traffic at -50.2% of 2019 levels. Fridays were the busiest days throughout May with an average of 14,396 flights. Turkish Airlines was again the busiest carrier in May with on average 641 flights/day, followed by Air France (411 flight/day), Ryanair (409 flights/day) and Lufthansa (407 flights/day). Ryanair total flights increased by 42.3% compared to April 2021 and went from a total of 8,912 flights to 12,681 flights in May. The busiest airport was Frankfurt/Main (548 flights/day), followed by Amsterdam/Schiphol (535 flights/day), IGA Istanbul (528 flights/day) and Paris/Charles de Gaulle (492 flights/day).

All-cargo remained the only segment above 2019 flight levels and increased by 7.3% in May 2021 compared to May 2019. Business aviation and Charter decreased by -9.3% and -28.1% respectively. After a minor blip over Easter in April, low-cost remained the most affected segment declining by 81.4% compared to May 2019. The traditional segment was stable, staying at -66.3%.

In the current circumstances, the NM will not report indicators on ATFM delay per flight until traffic recovers (Source: NM).

Delays from the passengers' point of view

For May 2021, the Central Office for Delay Analysis (CODA) reported that the average delay per flight on departure was 6.1 minutes per flight - a decrease of 2.0 minutes per flight compared to May 2020. 5% of the total delay can be attributable to air traffic control. Airlines caused 57% of the total delay, resulting from such issues as technical problems, staff shortages or turnaround times that are too tightly scheduled. Airports caused 7% of the delays while the rest (IATA Code 85,86,71-79,97-99) of around 29% can be allocated to other reasons (Source: CODA Dashboard-05-2021, Date 25/06/2021).

FABEC

In the FABEC area, traffic decreased by 66.7% in May 2021 compared to the same month in 2019, leading to a 68.8% traffic decrease YTD. Traffic was down in a similar way in all ANSPs, from -70.5% in skyguide, -70.2% in MUAC, -69.3% in DSN to -65.2% in LVNL. Airport traffic was down to a similar extent (-63.9% in the FABEC area) but with more disparities between ANSPs. Landings decreased by 69.9% in DFS, 67.9% in skyguide, but "only" 57.6% in DSN or 56.7% in skeys.

In May 2021, Marseille TMA (2 349 min), Paris ACC (1 357 min) and Zurich ACC (1 355 min) were the units to generate some en-route ATFM delays. In Marseille, delays were due to 'ATC-Capacity' (42%), 'Equipment' (39%), 'Staffing' (18%), 'Other' (1%). In Paris, delays were due to 'Other' (72%) and 'Staffing' (28%); in Zurich, 'ATC-Capacity' (100%).

Airport ATFM delays were mainly generated in Leipzig-Halle/EDDP (1 896 min), Paris-Le-Bourget/LFPB (1 327 min) and Toussus-Le-Noble/LFPN (1 092 min). In Leipzig-Halle, delays were due to 'Aerodrome Capacity' (68%) and 'Weather' (32%); in Paris-Le-Bourget, 'Aerodrome Capacity' (97%) and 'Staffing' (3%); in Toussus-Le-Noble, 'Aerodrome Capacity' (57%) and 'Staffing' (43%).

All Delay Causes

CRSTMP Delay Causes

The guideline for the en-route ATFM delay per movement is a basic cumulative extrapolation of the previous three years monthly allocation and is designed to give an impression, how the YTD figures should be, in order to reach the yearly 2021 published targets (3,88 min per flight for all delay causes and 2,56 min per flight for the delay causes CRSTMP). It should be noted that the FPP is still being coordinated and it is therefore very likely that the target value will be adjusted.

KPI #2: Arrival ATFM delay per controlled flight (FABEC)

	YTD 2021	YTD 2020		YTD 2021	YTD 2020
Arrival Delay All causes	0,08	0,64	Arrival Delay CRSTMP causes	0,02	0,03
<i>Diff. 2021 - 2020</i>	- 87 %		<i>Diff. 2021 - 2020</i>	- 49 %	
Minute ('000) ALL causes	29	356	Minute ('000) CRSTMP causes	5	16
<i>Diff. 2021 - 2020</i>	- 92 %		<i>Diff. 2021 - 2020</i>	- 67 %	
Traffic ('000)	355	554			
<i>Diff. 2021 - 2020</i>	- 35,9 %

Glossary

KPI #1:

KPI #1 is set by IR (EU) 2019/317 and is expressed in minutes per flight. The EU-wide targets set for RP3 for this indicator are for 2020: 0.9 min/fl., 2021: 0.9 min/fl., 2022: 0.7 min/fl., 2023: 0.5 min/fl., 2024: 0.5 min/fl.

The targets set at FABEC level are as follows for the indicator 'En-route ATFM delay (all regulation causes) per controlled flight' for **2020**: 3.45 min/fl., **2021**: 3.88 min/fl., **2022**: 3.61 min/fl., **2023**: 2.19 min/fl., **2024**: 1.78 min/fl.

The targets set at FABEC level are as follows for the indicator 'En-route ATFM delay (CRSTMP regulation causes) per controlled flight' for **2020**: 2.28 min/fl., **2021**: 2.56 min/fl., **2022**: 2.38 min/fl., **2023**: 1.45 min/fl., **2024**: 1.17 min/fl.

KPI #2:

KPI #2 is set by IR (EU) 2019/317 and is expressed in minutes per flight. For this indicator, no targets have been defined at EU and FABEC level for RP3. The targets have been set at local level.

Cause	CODE	Guidelines for Application
ATC Capacity	C	En Route: Demand exceeds or complexity reduces declared or expected ATC capacity Airport: Demand exceeds declared or expected ATC capacity.
ATC Industrial Action	I	Reduction in any capacity due to industrial action by ATC staff
ATC Routeings	R	Network solutions / scenarios used to balance demand and capacity
ATC Staffing	S	Unplanned staff shortage reducing expected capacity.
ATC Equipment	T	Reduction of expected or declared capacity due to the non-availability or degradation of equipment used to provide an ATC service.
Accident / Incident	A	Reduction of expected ATC capacity due to an aircraft accident / incident.
Aerodrome Capacity	G	Reduction in declared or expected capacity due to the degradation or non-availability of infrastructure at an airport. e.g. Work in Progress, shortage of aircraft stands etc. Or when demand exceeds expected aerodrome capacity.
Equipment NON ATC- to be Aerodrome Services	E	Reduced capacity due to the degradation or non-availability of support equipment at an airport e.g. Fire Service, De-icing / snow removal equipment or other ground handling equipment.
Industrial Action NON ATC	N	A reduction in expected / planned capacity due to industrial action by non ATC personnel.
Airspace Management	M	Reduction in declared or expected capacity following changes in airspace / route availability due to small scale military activity.
Special Event	P	Reduction in planned, declared or expected capacity or when demand exceeds the above capacities as a result of a major sporting, governmental or social event. It may also be used for ATM system upgrades and transitions. Large multinational military exercises may also use this reason. This category should only be used with prior approval during the planning process.
Weather	W	Reduction in expected capacity due to any weather phenomena. This includes where weather impacts airport infrastructure capacity, but where aerodrome services are operating as planned / expected.
Environmental Issues	V	Reduction in any capacity or when demand exceeds any capacity due to agreed local noise, runway usage or similar procedures. This category should only be used with prior agreement in the planning process.
Other	O	This should only be used in exceptional circumstances when no other category is sufficient. An explanatory ANM remark MUST be given to allow post ops analysis.

CRSTMP:

ATC Capacity (**C**), ATC Routeings (**R**), ATC Staffing (**S**), ATC Equipment (**T**), Airspace Management (**M**), Special Event (**P**); a set of regulation codes which are defined in the Common Charging Scheme Regulation (IR 2019/317) and subject to financial incentive.

Note: Arrival figures (traffic and delay) do only include EBBR and EBLG for Belgium and only EHAM for the Netherlands.

TABLE OF ABBREVIATIONS

ADM - Average en-route ATFM Delay per Movement

ANSP - Air Navigation Service Provider

ATFM - Air Traffic Flow Management

ANM - Aeronautical Notification Message

FABEC - Functional Airspace Block Europe Central

ATM - Air Traffic Management

PRU - Performance Review Unit

YTD - Year to Date value

FPP - FABEC Performance Plan

CODA - Central Office for Delay Analysis
