Description & Analysis

Europe

Traffic in October was at 87.6% of October 2019 levels, keeping it slightly below EUROCONTROL's baseline traffic scenario published on 06 April 2022. The war in Ukraine continues to affect overflights in several countries. Lithuania, Poland, Estonia and Latvia have lost traffic, whereas Armenia, Albania and Bosnia-Herzegovina have gained. On average, the network saw 27,756 flights/day in October. The peak day was Friday 07 October (29,997 flights) with traffic at 87.5% of 2019 levels. In October 2022, Business Aviation (+10.0%) was the only segment above 2019 flight levels while All-Cargo (-4.5%) recorded its biggest decrease owing mainly to domestic flows within NM area which went from +5.4% in September (vs Sep 2019) to -5.3% in October (vs Oct 2019). Low-Cost (-5.0%) continued to catch up in October 2022 (vs October 2019) whereas Charter has been recovering since the summer period to reach -14.5% of 2019 flight levels. The Mainline and Regional segments have been recovering since early 2022 and posted a decrease of -20.5% and -22.2% respectively in October 2022 compared to October 2019.

Ryanair was the busiest carrier in October with on average 2,869 flights/day, +15.5% of its 2019 traffic level, followed by easyJet (1,593 flights/day), Turkish Airlines (1,276 flights/day) and Lufthansa (1,171 flights/day).

The busiest airport was Amsterdam/Schiphol (1,227 flights/day), followed by Istanbul/IGA (1,202 flights/day), Paris/Charles de Gaulle (1,191 flights/day), Frankfurt/Main (1,149 flights/day) and London/Heathrow (1,123 flights/day). Network departure and arrival punctuality increased compared to last month but were still lower than the same period in 2019. The network (average) available turnaround time is again increasing and back to pre-summer levels which is an indication that reactionary delays are reducing. There were 1,541,691 minutes of ATFM delay in October. En-route delays accounted for 68.1% of these ATFM delays, and airports for 31.9%. The average en-route ATFM delay per flight for the network was 1.2 min in October and the YTD en-route ATFM delay was 2.0 min at the end of October (Source: NM).

Delays from the passengers' point of view

For October 2022, the Central Office for Delay Analysis (CODA) reported that the average delay per flight on departure was 15.7 minutes per flight - an increase of 7.7 minutes per flight compared to October 2021. 28% of the total delay can be attributable to air traffic control. Airlines caused 56% of the total delay, resulting from such issues as technical problems, staff shortages or turnaround times that are too tightly scheduled. Airports caused 6% of the delays while the rest (IATA Code 85,86,71-79,97-99) of around 12% can be allocated to other reasons (Source: CODA Dashboard-10-2022, Date 01/12/2022).

FABEC

In the FABEC area, traffic decreased by 11.4% in October 2022 compared to the same month in 2019, leading to a 16.7% traffic decrease YTD. Traffic was down in a similar way in 4 ANSPs, from -17.5% in skeyes, -17.2% in DFS, -17.0% in LVNL or -13.0% in MUAC, whereas traffic drop is significantly lower in both DSNA (-4.9%) and Skyguide (-4.9%). Airport traffic was down to a similar extent (-18.4% in the FABEC area) but with even more disparities between ANSPs. Landings decreased by an impressive -26.4% in DFS, 19.1% in skeyes, -16.5% in LVNL, but "only" -11.2% in DSNA or even -7.3% in ANA LUX.

In October 2022, Karlsruhe UAC (201 066 min), Reims ACC (108 169 min), Bremen ACC (84 300 min) and Marseille ACC (74 320 min) were the units to generate the most en-route ATFM delays. In Karlsruhe, delays were due to ATC-Capacity' (84%), 'Staffing' (7%), 'Other' (5% - Ukrainian crisis and 4Flight deployment in Reims), 'Weather' (4%). In Reims, delays were due to 'Staffing' (51%), 'ATC-Capacity' (26%), 'Special Event' (16% - 4Flight deployment), 'Industrial Action (ATC)' (4%), 'Other' (1%) and 'Weather' (1%); in Bremen, 'ATC-Capacity' (63%), 'Airspace Management' (35%), 'Staffing' (1%) and 'Weather' (1%); in Marseille, 'Staffing' (57% - training 4Flight), 'Equipment (ATC)' (21%), 'ATC-Capacity' (11%), 'Special Event' (5%), 'Airspace Management' (3%), 'Weather' (2%) and 'Other' (1%).

The en-route ATFM delay per flight all causes reached 1.21 min/flt in October 2022 compared to 0.47 min/flt in 2021. The YTD en-route ATFM delay per flight reached 2.10 min/flt and this value is far beyond the YTD guideline value (0.41 min/flt). The YTD en-route ATFM delay CRSTMP causes reached 1.36 min/flt; this value is, as well, far beyond the guideline value estimated at the end of October (0.28 min/flt).

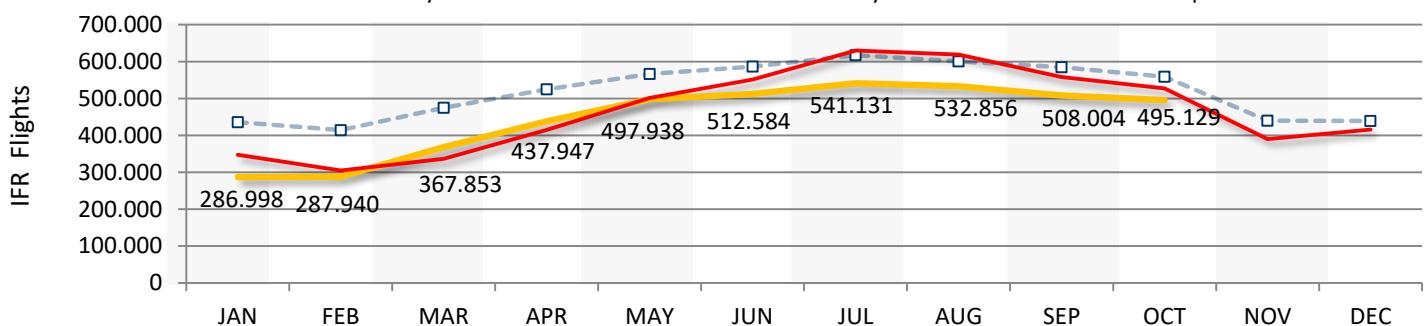

Airport ATFM delays were mainly generated in Paris Orly/LFPO (50 271 min), Frankfurt Main/EDDF (13 498 min) and Paris Charles de Gaulle/LFPG (12 130 min). In Paris Orly, delays were due to 'Aerodrome Capacity' (69%), 'Weather' (16%), 'Aerodrome Capacity (ATC)' (10%), 'Aerodrome Disruptions' (4%) and 'Staffing' (1%). In Frankfurt Main, delays were due to 'Weather' (76%), 'Aerodrome Disruptions' (18%), 'Aerodrome Disruptions (ATC)' (4%) and 'Aerodrome Capacity' (2%); in Paris Charles de Gaulle, 'Weather' (3%).

At the end of October 2022, both LVNL and MUAC achieve their respective en-route CRSTMP ATFM delay per flight target whereas the other ANSPs are not achieving it. For the arrival ATFM delay, DSNA and ANA LUX are currently missing their respective CRSTMP arrival ATFM delay flight target, contrarily to the other FABEC members.

The guideline for the en-route ATFM delay per movement is a basic cumulative extrapolation of the 2017-2019 monthly allocation and is designed to give an impression, how the YTD figures should be, in order to reach the yearly 2022 published targets (0,37 min per flight for all delay causes and 0,25 min per flight for the delay causes CRSTMP).

KPI #2: Arrival ATFM delay per controlled flight (FABEC)

<i>Diff. 2022 - 2021</i>	+ 58 %			

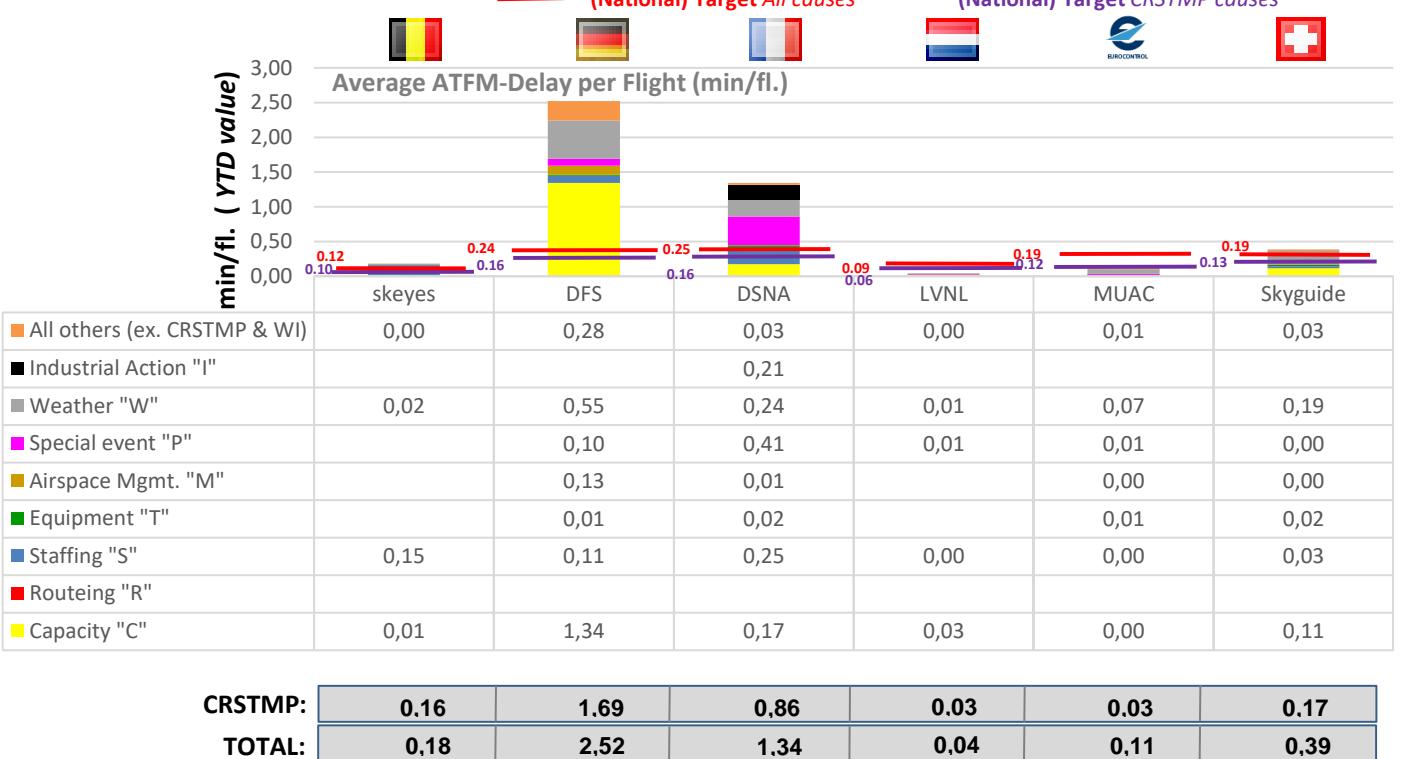

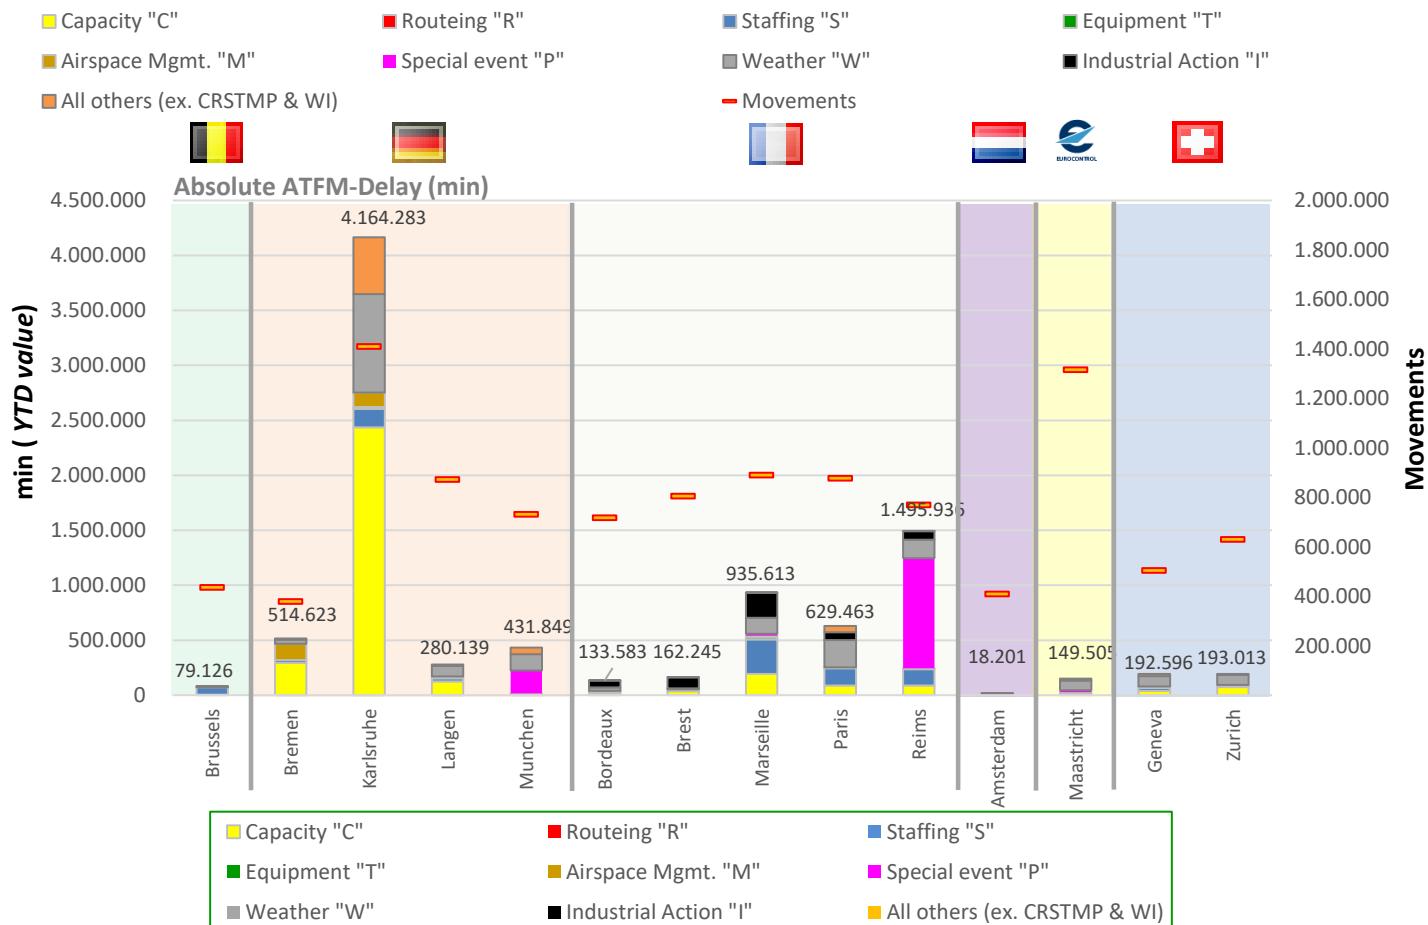

KPI #1: En-route ATFM delay per reason code (FABEC)

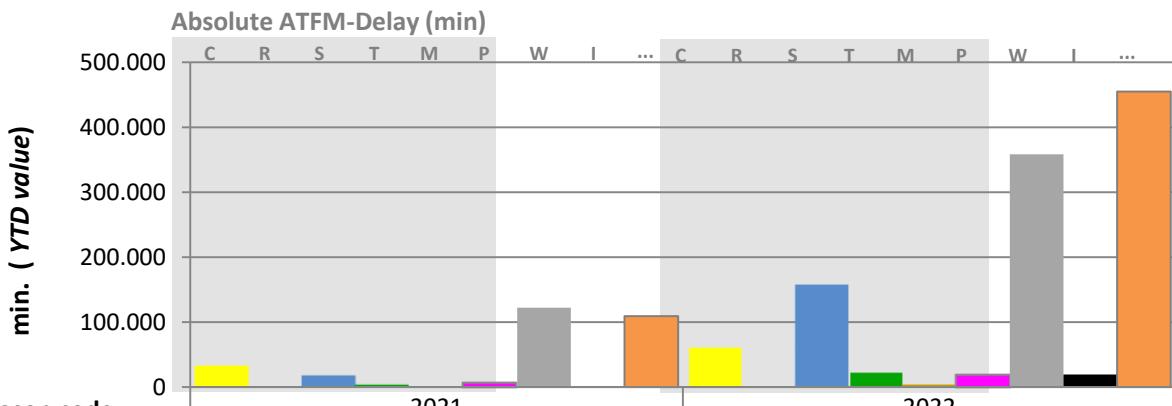

KPI #1: En-route ATFM delay per controlled flight (ANSP)

*Belgium and Luxembourg are in a common charging zone and FIR. There is no separate en-route delay figure and incentives/penalties are shared.

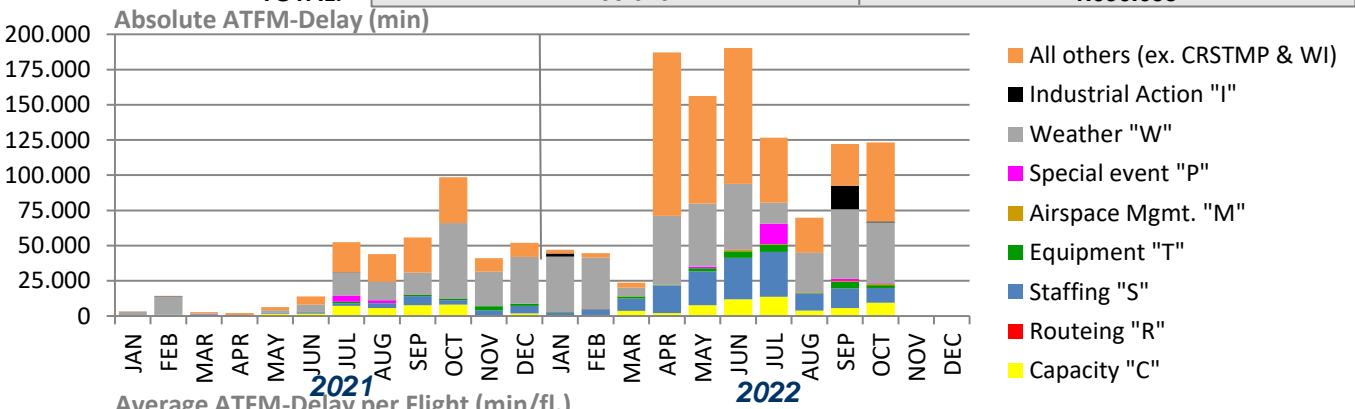

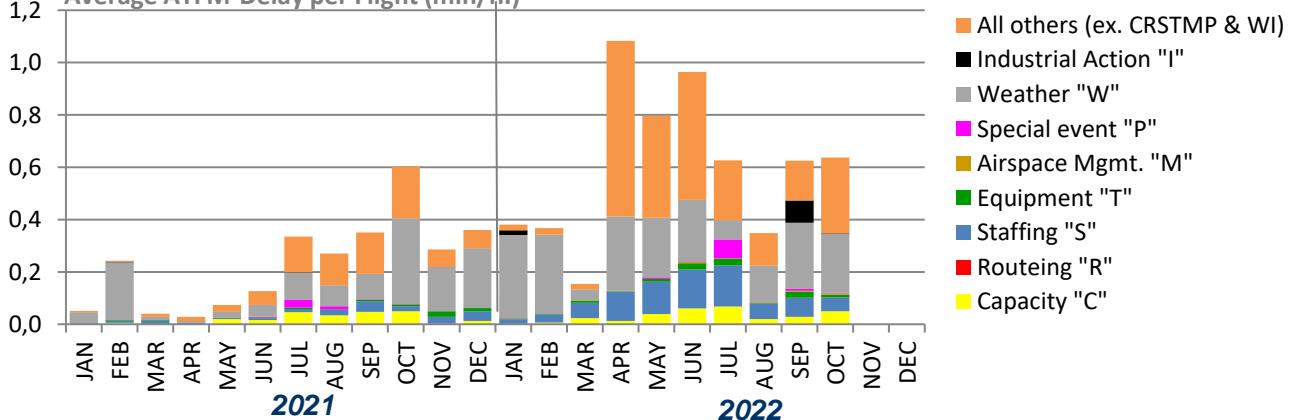

— (National) Target All causes — (National) Target CRSTMP causes

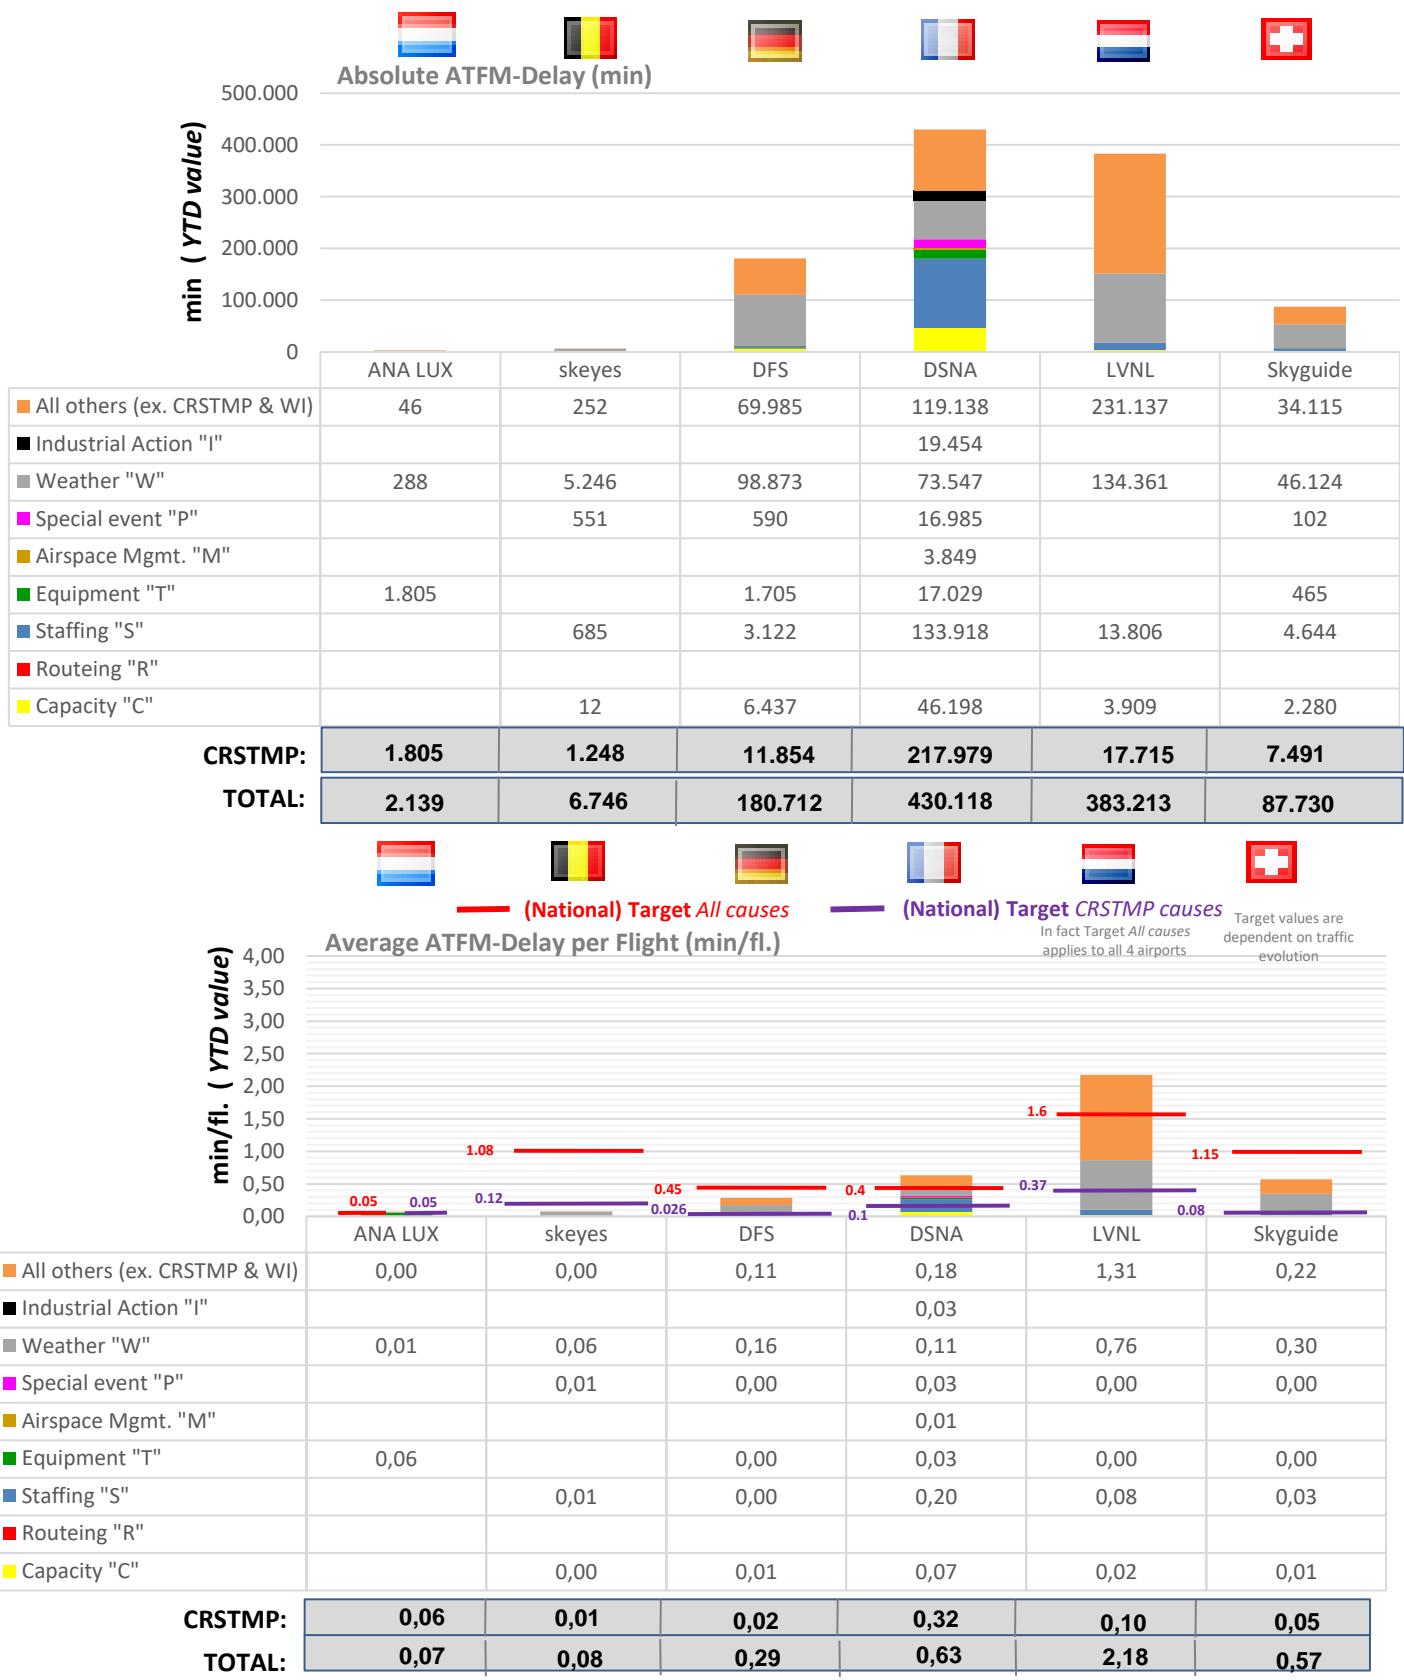

KPI #1: En-route ATFM delay per controlled flight (ACC)

KPI #2: Arrival ATFM delay per reason code (FABEC)

Delay due to reason code:

Capacity "C"	32.388	58.836
Routeing "R"	0	0
Staffing "S"	18.427	156.175
Equipment "T"	3.913	21.004
Airspace Mgmt. "M"	194	3.849
Special event "P"	6.782	18.228
Weather "W"	122.364	358.439
Industrial Action "I"	151	19.454
All others (ex. CRSTMP & WI)	109.360	454.673
CRSTMP:	61.704	258.092
TOTAL:	293.579	1.090.658

 Delay due to reason code
min. (monthly value)

 ADM due to reason code
min./fl. (monthly value)

KPI #2: Arrival ATFM delay per controlled flight (ANSP)

Glossary

KPI #1:

KPI #1 is set by IR (EU) 2019/317 and is expressed in minutes per flight. The EU-wide targets set for RP3 for this indicator are for 2020: 0.9 min/fl., 2021: 0.35 min/fl., 2022: 0.5 min/fl., 2023: 0.5 min/fl., 2024: 0.5 min/fl.

The targets set at FABEC level are as follows for the indicator 'En-route ATFM delay (all regulation causes) per controlled flight' for **2020**: 3.45 min/fl., **2021**: 0.27 min/fl., **2022**: 0.37 min/fl., **2023**: 0.37 min/fl., **2024**: 0.37 min/fl.

The targets set at FABEC level are as follows for the indicator 'En-route ATFM delay (CRSTMP regulation causes) per controlled flight' for **2020**: n.a., **2021**: n.a., **2022**: 0.25 min/fl., **2023**: 0.25 min/fl., **2024**: 0.25 min/fl.

KPI #2:

KPI #2 is set by IR (EU) 2019/317 and is expressed in minutes per flight. For this indicator, no targets have been defined at EU and FABEC level for RP3. The targets have been set at local level.

Cause	CODE	Guidelines for Application
ATC Capacity	C	En Route: Demand exceeds or complexity reduces declared or expected ATC capacity Airport: Demand exceeds declared or expected ATC capacity.
ATC Industrial Action	I	Reduction in any capacity due to industrial action by ATC staff
ATC Routeings	R	Network solutions / scenarios used to balance demand and capacity
ATC Staffing	S	Unplanned staff shortage reducing expected capacity.
ATC Equipment	T	Reduction of expected or declared capacity due to the non-availability or degradation of equipment used to provide an ATC service.
Accident / Incident	A	Reduction of expected ATC capacity due to an aircraft accident / incident.
Aerodrome Capacity	G	Reduction in declared or expected capacity due to the degradation or non-availability of infrastructure at an airport. e.g. Work in Progress, shortage of aircraft stands etc. Or when demand exceeds expected aerodrome capacity.
Equipment NON ATC- to be Aerodrome Services	E	Reduced capacity due to the degradation or non-availability of support equipment at an airport e.g. Fire Service, De-icing / snow removal equipment or other ground handling equipment.
Industrial Action NON ATC	N	A reduction in expected / planned capacity due to industrial action by non ATC personnel.
Airspace Management	M	Reduction in declared or expected capacity following changes in airspace / route availability due to small scale military activity.
Special Event	P	Reduction in planned, declared or expected capacity or when demand exceeds the above capacities as a result of a major sporting, governmental or social event. It may also be used for ATM system upgrades and transitions. Large multinational military exercises may also use this reason. This category should only be used with prior approval during the planning process.
Weather	W	Reduction in expected capacity due to any weather phenomena. This includes where weather impacts airport infrastructure capacity, but where aerodrome services are operating as planned / expected.
Environmental Issues	V	Reduction in any capacity or when demand exceeds any capacity due to agreed local noise, runway usage or similar procedures. This category should only be used with prior agreement in the planning process.
Other	O	This should only be used in exceptional circumstances when no other category is sufficient. An explanatory ANM remark MUST be given to allow post ops analysis.

CRSTMP:

ATC Capacity (**C**), ATC Routeings (**R**), ATC Staffing (**S**), ATC Equipment (**T**), Airspace Management (**M**), Special Event (**P**); a set of regulation codes which are defined in the Common Charging Scheme Regulation (IR 2019/317) and subject to financial incentive.

Note: Arrival figures (traffic and delay) do only include EBBR and EBLG for Belgium and only EHAM for the Netherlands.

TABLE OF ABBREVIATIONS
